

GOVERNANCE MODEL

The CERF Governance Model operates through the collaborative efforts of the Affinity and Sub-Regional Tables, the Steering Committee, and the Stewardship Committee. These groups work together, ensuring a smooth flow of data and information throughout the process.

The Affinity and Subregional Tables actively engage in outreach and receive feedback from targeted stakeholders, enabling the development of an inclusive economic regional plan. The valuable insights and data collected by these tables are then shared with the Steering Committee.

As the validating body, the Steering Committee incorporates the feedback and data received from the Affinity and Subregional tables. They make informed decisions based on this information and provide guidance for the governance structure as a whole.

The Stewardship Committee plays a vital role in implementing the decisions made by the Governance Body. They serve as facilitators and technical advisors, ensuring that the decisions are effectively translated into action.

Through this collaborative process, the data and information flow from the Affinity and Subregional Tables to the Steering Committee and then to the Stewardship Committee, ensuring a coordinated and inclusive approach within the CERF Governance Model.

To learn more about the function of each group, please review our [Governance Narrative](#).

CBO SPA-BASED MICROGRANTEES

90 SPA-Based Microgrants

TABLE PARTNER LEADS

8 Table Partner Leads

AFFINITY HUB LEADS

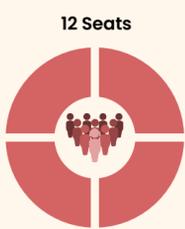

12 Affinity Areas
